ACCESSB5

Designed for maximum accessibility and autonomy:

Comfortable and safe transfer with smooth and progressive movement always facing the water.

Total immersion of the seat in the water to allow exiting or accessing it by swimming (avoiding jumps or efforts to the user).

Double lever with smooth turning operation to offer maximum autonomy to the user in and out of the water.

Minimal obstacles and an open angle of the seat to facilitate transferring to the seat from outside the water.

With a **stable support bar** that is easily adjustable in height to adapt to the needs of each person.

With **optional accessories** to reinforce safety and adaptability to users.

TECHNICAL ADVANTAGES

Elegant design that blends in with the pool environment.

High lifting capacity up to 150 Kg, certified and approved.

With various anchoring arm sizes available to adapt to all types of pool profiles.

Portable and lightweight to be shared among multiple pools.

Easy installation. Without requiring any work on the pool, with a single recessed anchor, the lift can be installed and moved very easily by any maintenance technician.

Manufactured in our own workshop in Spain with high quality and resistant materials.

Minimum maintenance and maximum guarantees with **technical assistance**.

Compact packaging for **easy transport**.
